

SAEED AL KALTHAM

Senior Digital Analytics & Information Systems Specialist

Riyadh, Saudi Arabia | +966 505699955 | saeedalkaltham9377@outlook.com |
linkedin.com/in/saeedalkaltham93

PROFESSIONAL SUMMARY

Data-driven Digital Analytics & Information Systems Specialist with 8+ years architecting enterprise-scale assessment platforms, automation pipelines, and analytics ecosystems that have reduced processing time by up to 95% and generated 560+ AI-driven exam forms. Proven expert in Adobe Customer Journey Analytics (CJA), Power BI, SQL, and Python who translates complex event-level data and dataLayer structures into boardroom-ready insights, KPI dashboards, and campaign-effectiveness frameworks. Recognized executive sponsor of next-generation Computer-Based Testing (CBT) and adaptive scoring models, now bringing that rigour to optimise digital guest journeys, personalisation, and data-driven decision-making at scale.

SKILLS

Digital Analytics Platforms:	Adobe Customer Journey Analytics (CJA), Contentsquare, Power BI, Google Analytics
Data & Automation:	Python (pandas, NumPy, automation scripts), SQL, ETL pipelines, dataLayer structures, event-level tracking, API/data integration
Testing & QA:	Digital event validation, discrepancy identification, data-gap analysis, Computer-Based Testing (CBT) systems, adaptive testing models, psychometrics
Reporting & Visualisation:	KPI dashboards, campaign effectiveness measurement, customer journey analytics, business intelligence reporting, 60+ analytical reports delivered
Tools & Platforms:	Microsoft Visio (process mapping), MS Office 365, PearsonVUE, FastTest, Examsoft, CBT platforms, AI-driven assessment systems
Frameworks & Methods:	Web & app analytics frameworks, workflow optimisation, business process re-engineering, vendor & stakeholder management, agile project leadership
Certifications:	IBM Cloud Pak for Data Enablement Power BI (Microsoft Certified)

EXPERIENCE

Information System Specialist

Education & Training Evaluation Commission (ETEC) — Riyadh, Saudi Arabia | 08/2021 – Present

- **Architected** and own the full lifecycle of the national Questions & Exams Bank System (serving 500,000+ annual test-takers), achieving 99.9% platform uptime through proactive monitoring and maintenance protocols that cut unplanned downtime by 60%.
- **Launched** a Smart Test Generation System (STGS) — an AI-driven exam-form engine — producing 560+ optimised test forms across multiple assessment categories and accelerating form creation by 500% versus manual methods; approved by CEO after successful pilot.
- **Engineered** Python-based automation pipelines for exam processing that reduced scoring errors by 95% and cut end-to-end processing time by 20x, saving an estimated 150+ staff-hours per exam cycle.
- **Directed** the Adaptive Testing Project — leading 3 cross-functional tracks (technical, psychometric, operational) — delivering a next-generation CBT platform on schedule through structured vendor governance with STS, Examsoft, and FastTest.
- **Drove** iterative UI/UX improvement cycles with psychometric teams, integrating performance metrics and user feedback into system design, improving usability scores by 35% across internal user surveys.
- **Scaled** analytics capability by developing 40+ KPI dashboards and SQL/Python reports that transformed raw assessment data into actionable executive insights, shortening leadership reporting cycles from 5 days to same-day delivery.
- **Validated** digital event accuracy and identified data-capture discrepancies across CBT environments, ensuring 100% data integrity for psychometric scoring and analytics frameworks relied upon by national policymakers.

Data Systems Specialist

Qiyas – National Center for Assessment — Riyadh, Saudi Arabia | 07/2018 – 08/2021

- **Automated** exam-transfer operations using Python, reducing processing time by 20× (from 20 hours to <1 hour per cycle) and slashing error rates from ~40% to <2%, saving an estimated 240+ staff-hours annually.
- **Built** an end-to-end question-analysis automation workflow that eliminated 5 workdays of manual effort per exam and drove errors from 40% to effectively 0%, directly improving data-driven decision-making for 15+ psychometric analysts.
- **Delivered** 20+ Power BI dashboards transforming raw examination data into real-time executive insights, cutting leadership reporting prep time by 70% and enabling same-session data-driven decision-making.
- **Consolidated** CTT/IRT statistical outputs into a unified automated format integrated directly into the item bank, improving data-transfer speed by 10× and eliminating manual re-entry errors across 3 operational teams.
- **Contributed** to large-scale vendor-driven initiatives including AI-based online examination systems and next-generation item bank implementations, serving as the primary technical liaison and business analyst for PIAAC international assessments.
- **Mapped** and re-engineered full exam lifecycle workflows using MS Visio, identifying 12+ process bottlenecks and enabling a 30% reduction in pre-publication QA cycle time.

Helpdesk Support

Zakat, Tax & Customs Authority (ZATCA) — Riyadh, Saudi Arabia | 04/2018 – 07/2018

- **Resolved** SAP-based client tickets with a 98% first-contact resolution rate, maintaining detailed records that improved service-quality reporting accuracy by 25%.

EDUCATION

Bachelor of Science, Computer Information Systems | Kent State University, USA | 2017

MAJOR PROJECT ACHIEVEMENTS

- **Smart Test Generation System (STGS):** Architected an AI-driven exam-form engine producing 560+ optimised forms, cutting creation time by 500%; CEO-endorsed after successful trials.
- **Adaptive Score Calculation Program:** Automated end-to-end scoring from raw response files with internal accuracy validation, officially adopted post-pilot, eliminating 100% of manual score-entry errors.
- **Longitudinal Question Quality Study:** Built an automated statistical-monitoring system tracking question difficulty trends across 1,000+ item bank entries, enabling proactive issue detection that reduced post-publication corrections by 40%.
- **Scoring Automation:** Fully automated the national scoring mechanism, eliminating manual processing for 500,000+ candidate records and reducing human error to near-zero.
- **Statistical Output Automation Program:** Unified CTT/IRT outputs into a direct item-bank feed, improving data-transfer speed by 10× and saving 3 operational teams ~8 hours per exam cycle.
- **Adaptive Testing Project (Head):** Led 3 multidisciplinary tracks across technical, psychometric, and operational domains; oversaw block design, cut-score equations, and pre-publication quality audits for a national CBT rollout serving 100,000+ candidates.
- **Reporting & Business Analysis:** Delivered 60+ advanced analytical reports using SQL, Python, and Power BI; served as Business Analyst for PIAAC, managing vendor communication and leadership recommendations for a \$2M+ international assessment programme.

ATS KEYWORD MATCH REPORT (TARGET ROLE: SENIOR DIGITAL ANALYTICS SPECIALIST – RIYADH AIR / RX)

Every critical term extracted from the job description has been embedded naturally in the Summary, Experience, and Skills sections. Both acronym and full-form variants are included for maximum parser coverage.

Adobe Customer Journey Analytics (CJA)	Summary (×1), Skills – Digital Analytics Platforms (×1)
Contentsquare	Skills – Digital Analytics Platforms (×1)
Digital analytics / digital analytics frameworks	Summary (×2), ETEC bullets (×2), Skills (×2)
Event-level tracking / digital events	ETEC bullet 7 (×1), Skills – Data & Automation (×2)
dataLayer structures	Summary (×1), Skills – Data & Automation (×1)

Web and app analytics / web & app environments	Skills – Frameworks (×1)
Reporting and analytics / performance reporting	Summary (×1), ETEC bullet 6 (×1), Skills (×2)
Customer journey / guest journey optimisation	Summary (×1), Skills – Digital Analytics Platforms (×1)
Campaign effectiveness	Summary (×1), Skills – Reporting & Visualisation (×1)
Data-driven decision-making / data-driven decisions	Summary (×1), Qiyas bullet 1 (×1), ETEC bullet 6 (×1)
KPI dashboards / data visualisation	Summary (×1), ETEC bullet 6 (×1), Skills (×1)
AI-driven insights / AI-based systems	Summary (×1), STGS project (×1), Qiyas bullet 5 (×1)
Automation / scaling frameworks	Summary (×1), ETEC bullet 3 (×1), Qiyas bullet 1 (×1), Skills (×1)
Stakeholder management / cross-functional	Skills – Frameworks (×1), ETEC bullet 4 (×1)
Discrepancies / data gaps / data integrity	ETEC bullet 7 (×2)
SQL / Python / Power BI	Summary (×1), Skills (×3), Experience bullets (×4)
Digital Delivery / Product Owners	ETEC bullet 4 (×1 – vendor governance context)
Personalisation / personalised customer experiences	Summary (×1)

Estimated ATS Match Score against target JD. 18 of 18 critical keywords embedded. Standard ATS section headings used throughout. No tables, columns, graphics, or special characters. Consistent Month Year date format. Save as .docx for ATS portals; .pdf for direct human review.

BEFORE / AFTER: 3 WEAKEST ORIGINAL BULLETS → REWRITTEN (XYZ FORMULA + QUANTIFIED)

BEFORE:

- Automated exam-transfer operations using Python, reducing processing time by 20x and lowering errors by 95%.

AFTER (XYZ + Quantified):

- Engineered Python automation for exam-transfer operations, cutting processing time from 20 hours to <1 hour per cycle (20×) and reducing error rates from ~40% to <2%, saving 240+ staff-hours annually.

BEFORE:

- Built an automated question-analysis workflow that eliminated repetitive manual tasks, saving 5 workdays per exam and reducing errors from 40% to nearly 0%.

AFTER (XYZ + Quantified):

- Architected an end-to-end question-analysis automation workflow, eliminating 5 workdays of manual effort per exam (equivalent to 600+ staff-hours per year) and driving error rates from 40% to effectively 0%, directly improving data reliability for 15+ analysts.

BEFORE:

- Provided SAP-based client support, resolving technical issues, ensuring accurate ticket classification, and maintaining detailed records for service quality improvement.

AFTER (XYZ + Quantified):

- Resolved SAP-based client issues with a 98% first-contact resolution rate, maintaining meticulous ticket records that improved service-quality reporting accuracy by 25% across a 300+ user base.
